

Earth Valley

Powered by ROM Utrecht Region

With the ambition to be the healthiest region in Europe – under the motto 'Utrecht, Heart of Health' – the Utrecht region is working on three ecosystems. Together, we're working on a better world for healthy people, a healthy living environment, and a healthy society in an increasingly digital world.

The sustainable, social ambitions for a healthy living environment are the motivation for the Earth Valley ecosystem. Here, companies, knowledge institutions and governments work together on innovative solutions to social issues in the field of a sustainable living environment, housing, mobility, climate adaptation and energy transition. The strong presence of intelligent solutions and technologies in the Utrecht region fuels this drive.

This visualization of the Earth Valley ecosystem shows the strength and potential of the Utrecht region in relation to the stated ambitions. We acknowledge that our journey is not complete; the current visualization represents a snapshot of June 2023.

If you notice an omission or wish to register your organization, please reach out to us at earthvalley@romutrechtregion.nl.
